

Date: September 11, 2026

Time: 4:00 PM - 5:00 PM

Location: Eaton 3001

Objective: Brainstorm and assign based on requirements

Team Members Present: Lena, Joshua, John, Trey, Tyler, Nickan

Track Completion Confirmation:

N/A

Tasks Allocated (ALL DUE NEXT SCRUM - 9/18/2026):

- **Language:** Python
- **John:** Initial bomb placement algorithm to ensure no immediate win/loss. MineAlgorithm (matrix, x, y, n)
- **Jack:** UI improvements once Trey has finished or help elsewhere if needed
- **Lena:** Flagging operation - called by UI click, should toggle flag bit for square w/o overriding square state (bomb)
- **Tyler:** RecOpen (matrix, x, y) Function, should use CheckSquare to determine what squares should be revealed (0 adjacent bombs) and return a matrix
- **Trey:** UI creation and calling corresponding functions based on user clicks.
- **Nickan:** CheckSquare (matrix, x, y) function to return the number of adjacent bombs or if it is a bomb. Outcome (Matrix, x, y) to determine game win/loss state. Outcome should call RecOpen based on the outcome.
- **Joshua:** Finalize Artifacts based on scrum discussion & resulting infrastructure, possible game state class & ensure no integration issues when programming

UI - Trey + Matt
 Array - Mine state - Nick
 Recursive Open - Tyler
 Initial Mine Placement - John
 Flagging - Lena
 Win/Loss Conditions - Nick
 Game state Class - Josh
 UI + - Jack

(click = x,y - cell position)
 0 = covered
 1 = Flag
 2 = Uncovered
 3 = Bombs

RecOpen(Matrix, click)
 MineAlgorithm(Matrix, click)
 finished = 0, 1
